TaskFlow documented requirements - README baseline

SECJ3343 Project 1 - Group TaskFlow. Committed source baseline main@5133a6c.

https://github.com/aland99/TaskFlow

This is a faithful text snapshot of the named repository files used to derive acceptance requirements. Line numbers refer to the committed source. Wrapped continuation lines retain indentation. Source behavior is distinguished from independently documented requirements in each member's test basis.

README.md

```
# TaskFlow

A single-user task manager built with React + Vite. It is the software under test for an SQA project, so behaviour and on-screen text are kept predictable.

## Run it

```
npm install
npm run dev      # http://localhost:5173
npm test         # validation + overdue checks (plain node:assert)
npm run build    # production build into dist/
```

No backend, login or API key. Data lives in the browser's localStorage.

Storage

- Tasks: localStorage key `taskflow_tasks` (JSON array).
- If that value is not valid JSON or not an array, the raw text is copied to `taskflow_tasks_backup`, the app starts empty and shows a warning banner with a "Reset storage" button (removes `taskflow_tasks`, keeps the backup).
- Saved entries with a missing id, bad title/priority/status/due date, missing createdAt or a duplicate id are skipped and counted in the banner (no Reset button in that case, the other tasks stay).
- Task fields: `id`, `title`, `description`, `priority`, `status`, `dueDate` (`YYYY-MM-DD` or `""`), `createdAt`, `updatedAt` (ISO timestamps).

Requirements traceability

Requirement	Where it is implemented
TF-REQ-001 Required title	`src/utils/validation.js` (`validateTask`), inline message in `src/components/TaskFormModal.jsx`
TF-REQ-002 Title length 3-80 (code points, trimmed)	`src/utils/validation.js` (`countChars`, `TITLE_MIN`, `TITLE_MAX`), counter in `TaskFormModal.jsx`
TF-REQ-003 Description max 500 + counter	`validation.js`, counter in `TaskFormModal.jsx`
TF-REQ-004 Priority Low/Medium/High, default Medium	`validation.js` (`PRIORITIES`), `TaskFormModal.jsx` (default + dropdown)
TF-REQ-005 Status To Do/In Progress/Completed, default To Do	`validation.js` (`STATUSES`), `TaskFormModal.jsx` (default + dropdown)
TF-REQ-006 Due date + overdue	`src/utils/dates.js` (`isValidDateString`, `isOverdue`), `src/components/TaskCard.jsx` (Overdue badge, red date)
TF-REQ-007 Successful creation	`src/App.jsx` (`createTask`, `commit`), `src/utils/tasks.js` (`buildTask`), `src/utils/storage.js` (`saveTasks`), `Toast.jsx`
TF-REQ-008 Cancel creation	`TaskFormModal.jsx` Cancel button, `Modal.jsx` (Escape, X, backdrop)
TF-REQ-009 Prefilled edit form	`TaskFormModal.jsx` (`task` prop), `App.jsx` (edit modal keyed by task id)
TF-REQ-010 Successful editing	`App.jsx` (`updateTask`): keeps `id` and `createdAt`, sets `updatedAt`
TF-REQ-011 Invalid editing	`TaskFormModal.jsx` (`handleSubmit`): modal stays open, nothing is saved
TF-REQ-012 Cancel editing	`Modal.jsx` / `TaskFormModal.jsx`: unsaved changes are discarded
TF-REQ-013 Delete confirmation	`src/components/ConfirmDeleteModal.jsx`
TF-REQ-014 Confirm deletion	`App.jsx` (`deleteTask`)
TF-REQ-015 Cancel deletion	`ConfirmDeleteModal.jsx` Cancel button
TF-REQ-016 Status updates	`App.jsx` (`changeStatus`), status dropdown in `TaskCard.jsx`, counts in `SummaryCards.jsx`
TF-REQ-017 Completed tasks	`dates.js` (`isOverdue` ignores Completed), `SummaryCards.jsx` (own count)
TF-REQ-018 Priority updates	Edit modal (`TaskFormModal.jsx`), priority filter in `TaskToolbar.jsx` / `src/utils/tasks.js`
TF-REQ-019 Search	`src/utils/tasks.js` (`filterAndSortTasks`), search inputs in `TopBar.jsx` and `TaskToolbar.jsx` (shared state)

Exact messages (for expected results)

Validation (shown under the field; the form is not saved while any is showing):

Case	Message
Title empty or only spaces	`Title is required.`
```

Title under 3 characters (after trimming)	`Title must be at least 3 characters.`
Title over 80 characters (after trimming)	`Title must be 80 characters or fewer.`
Description over 500 characters (after trimming)	`Description must be 500 characters or fewer.`
Priority not Low/Medium/High	`Please select a valid priority.`
Status not To Do/In Progress/Completed	`Please select a valid status.`
Due date not a real YYYY-MM-DD date	`Please enter a valid date (YYYY-MM-DD).`

Notes: length is counted in Unicode code points (an emoji = 1). Leading/trailing spaces are trimmed before counting and before saving. The inputs have no `maxLength`, so 81 and 501 characters can be typed. The counters read `n / 80` and `n / 500` and turn red when over. After the first failed submit the messages update live.

Toasts (auto-close after about 3 seconds, or click the X):

Action	Toast
Create	`Task created successfully.`
Edit	`Task updated successfully.`
Delete	`Task deleted successfully.`
Status changed from the list	`Task status updated.`
Browser refused the save (storage full/blocked)	`Could not save tasks to browser storage.`

Empty states:

Case	Title	Button
No tasks at all	`No tasks yet`	`Create your first task`
Search has no hits	`No tasks match "<query>"`	`Clear search`
Filters have no hits	`No tasks match the current filters`	`Clear filters`

Storage warnings:

- `Saved task data was corrupted and could not be loaded. A backup was kept.`
- `<n> saved entry was invalid and skipped. A backup was kept.` / `<n> saved entries were invalid and skipped. A backup was kept.`
- `Browser storage is unavailable, so tasks cannot be loaded or saved.`

Dialog text: "New Task" (Cancel / Create Task), "Edit Task" (Cancel / Save Changes), "Delete Task" with `Are you sure you want to delete "<title>"? This cannot be undone.` (Cancel / Confirm Delete).

Behaviour notes

- Overdue = due date earlier than today (local date) and status not Completed. Due today is not overdue (it shows a "Due today" badge instead).
- The summary cards always count all tasks, ignoring search and filters.
- Search is case-insensitive, trims the query, and matches part of a title or description. Search, status and priority filters combine with AND.
- Sort: Newest first (default), Oldest first, Due date: soonest, Due date: latest. Tasks with no due date are always last in the due-date sorts.
- Sidebar: Dashboard and All Tasks show every status; To Do / In Progress / Completed set the status filter (and the page title follows). Collapse button on desktop, drawer under 768px.
