Table Of Contents

1. SRS-C-ENUM : Priority, status transitions and task summaries

REQ-C-001 : Priority values and validation

REQ-C-002 : Status values and validation

REQ-C-003 : Status change and summary totals

REQ-C-004 : Completed task presentation

1. Requirements Spec.: SRS-C-ENUM : Priority, status transitions and task summaries	
revision	1
Author	lanya
Type	User Requirement Specification
Total count of requirements (Coverage)	100% (4/4)
README.md TF-REQ-004, TF-REQ-005, TF-REQ-016 and TF-REQ-017. Code-derived acceptance detail is cited to validation.js, TaskCard.jsx, SummaryCards.jsx and App.jsx. No separate customer SRS exists.	

Requirement: REQ-C-001 : Priority values and validation	
Version :	1
revision:	1
Author:	lanya
Status	Valid
Type	Use Case
Coverage	100% (1/1)
README.md TF-REQ-004 specifies Low, Medium and High. src/utils/validation.js PRIORITIES and validateTask accept exactly those case-sensitive strings; an invalid value returns "Please select a valid priority." The native select in src/components/TaskFormModal.jsx offers only the three valid options.	
Related Test Cases	TF-1 : TC-C-001 - Accepted priority partition: Low [Version :1]TF-2 : TC-C-002 - Accepted priority partition: Medium [Version :1]TF-3 : TC-C-003 - Accepted priority partition: High [Version :1]TF-7 : TC-C-007 - Reject unsupported priority string in validator harness [Version :1]TF-8 : TC-C-008 - Reject non-string and missing priority values in validator harness [Version :1]TF-11 : TC-C-011 - Report both invalid enum fields together [Version :1]

Requirement: REQ-C-002 : Status values and validation	
Version :	1
revision:	1
Author:	lanya
Status	Valid
Type	Use Case
Coverage	100% (1/1)
README.md TF-REQ-005 specifies To Do, In Progress and Completed. src/utils/validation.js STATUSES and validateTask accept exactly those case-sensitive strings; an invalid value returns "Please select a valid status." The native selects in src/components/TaskFormModal.jsx and src/components/TaskCard.jsx offer only those options.	
Related Test Cases	TF-4 : TC-C-004 - Accepted status partition: To Do [Version :1]TF-5 : TC-C-005 - Accepted status partition: In Progress [Version :1]TF-6 : TC-C-006 - Accepted status partition: Completed [Version :1]TF-9 : TC-C-009 - Reject unsupported status string in validator harness [Version :1]TF-10 : TC-C-010 - Reject non-string and missing status values in validator harness [Version :1]TF-11 : TC-C-011 - Report both invalid enum fields together [Version :1]TF-12 : TC-C-012 - Status transition To Do to In Progress [Version :1]TF-13 : TC-C-013 - Status transition To Do to Completed [Version :1]TF-14 : TC-C-014 - Status transition In Progress to To Do [Version :1]TF-15 : TC-C-015 - Status transition In Progress to Completed [Version :1]TF-16 : TC-C-016 - Status transition Completed to To Do [Version :1]TF-17 : TC-C-017 - Status transition Completed to In Progress [Version :1]TF-18 : TC-C-018 - Same-state selection behavior for To Do [Version :1]TF-19 : TC-C-019 - Same-state selection behavior for In Progress [Version :1]TF-20 : TC-C-020 - Same-state selection behavior for Completed [Version :1]

Requirement: REQ-C-003 : Status change and summary totals	
Version :	1
revision:	1
Author:	lanya
Status	Valid
Type	Use Case
Coverage	100% (1/1)
README.md TF-REQ-016 requires status updates and status counts; Behaviour notes require summary cards to count all tasks regardless of search and filters. src/App.jsx changeStatus ignores unsupported values, persists an accepted status change and shows "Task status updated." src/components/SummaryCards.jsx counts tasks and each status from the complete tasks array.	
Related Test Cases	TF-12 : TC-C-012 - Status transition To Do to In Progress [Version :1]TF-13 : TC-C-013 - Status transition To Do to Completed [Version :1]TF-14 : TC-C-014 - Status transition In Progress to To Do [Version :1]TF-15 : TC-C-015 - Status transition In Progress to Completed [Version :1]TF-16 : TC-C-016 - Status transition Completed to To Do [Version :1]TF-17 : TC-C-017 - Status transition Completed to In Progress [Version :1]TF-18 : TC-C-018 - Same-state selection behavior for To Do [Version :1]TF-19 : TC-C-019 - Same-state selection behavior for In Progress [Version :1]TF-20 : TC-C-020 - Same-state selection behavior for Completed [Version :1]TF-21 : TC-C-021 - Summary totals ignore search filtering [Version :1]TF-22 : TC-C-022 - Summary totals ignore status filtering [Version :1]TF-23 : TC-C-023 - Summary totals ignore priority filtering [Version :1]TF-24 : TC-C-024 - Summary totals ignore combined filtering [Version :1]

Requirement: REQ-C-004 : Completed task presentation	
Version :	1
revision:	1
Author:	lanya
Status	Valid
Type	Use Case
Coverage	100% (1/1)
README.md TF-REQ-017 gives Completed its own count and exempts it from overdue treatment. src/components/TaskCard.jsx adds class "completed" for Completed tasks, uses isOverdue for the Overdue badge/red date, and suppresses the Due today badge for Completed tasks; src/utils/dates.js isOverdue excludes status Completed.	
Related Test Cases	TF-25 : TC-C-025 - Completed overdue card has completed styling and no overdue treatment [Version :1]TF-26 : TC-C-026 - Completed task due today omits Due today badge [Version :1]TF-37 : TC-C-037 - Fixed local yesterday-today-tomorrow by completion state [Version :1]TF-38 : TC-C-038 - Overdue result changes when a task becomes Completed [Version :1]

    - REQ-C-008 : Local calendar day and date display

1. Requirements Spec.: SRS-C-DATE : Due dates, local calendar rules and formatting

revision	1
Author	lanya
Type	User Requirement Specification
Total count of requirements (Coverage)	100% (4/4)

README.md TF-REQ-006 plus its Behaviour notes on overdue dates. Code-derived acceptance detail is cited to dates.js, validation.js, TaskFormModal.jsx, TaskCard.jsx and TopBar.jsx. No separate customer SRS exists.

Requirement: REQ-C-005 : Optional due date and real calendar validation	
Version :	1
revision:	1
Author:	lanya
Status	Valid
Type	Use Case
Coverage	100% (1/1)

README.md TF-REQ-006 allows an optional due date stored as YYYY-MM-DD and Exact messages states "Please enter a valid date (YYYY-MM-DD)." for an invalid real date. src/utils/validation.js validateTask accepts undefined, null and empty string as absent and rejects any other value that is not a real calendar date per src/utils/dates.js isValidDateString. src/components/TaskFormModal.jsx uses a native input type=date, which sanitizes impossible values before application validation.

Related Test Cases	TF-27 : TC-C-027 - Empty due date is a valid optional value [Version :1]TF-28 : TC-C-028 - Valid leap-day date is retained and formatted [Version :1]TF-29 : TC-C-029 - Native date input sanitizes impossible date before validator [Version :1]TF-30 : TC-C-030 - Validator rejects impossible calendar date independently of native control [Version :1]TF-32 : TC-C-032 - Day-of-month minimum and maximum boundaries [Version :1]TF-36 : TC-C-036 - Date string shape and optional absence partitions [Version :1]

Requirement: REQ-C-006 : Leap years and calendar boundaries	
Version :	1
revision:	1
Author:	lanya
Status	Valid
Type	Use Case
Coverage	100% (1/1)
README.md TF-REQ-006 requires a due date and the source date format is YYYY-MM-DD. src/utils/dates.js isValidDateString requires the exact four-two-two digit format, month 1-12, day >=1, month-specific maximum days and Gregorian leap-year rule (divisible by 4 except centuries unless divisible by 400). No separate application minimum/maximum year or due-date range is documented.	
Related Test Cases	TF-28 : TC-C-028 - Valid leap-day date is retained and formatted [Version :1]TF-30 : TC-C-030 - Validator rejects impossible calendar date independently of native control [Version :1]TF-31 : TC-C-031 - Leap-year divisibility decision table [Version :1]TF-32 : TC-C-032 - Day-of-month minimum and maximum boundaries [Version :1]TF-33 : TC-C-033 - Leap-February day maximum and max+1 [Version :1]TF-34 : TC-C-034 - Thirty-day month maximum and max+1 [Version :1]TF-35 : TC-C-035 - Month range min-1/min/max/max+1 [Version :1]TF-36 : TC-C-036 - Date string shape and optional absence partitions [Version :1]

Requirement: REQ-C-007 : Overdue and due-today decision	
Version :	1
revision:	1
Author:	lanya
Status	Valid
Type	Use Case
Coverage	100% (1/1)
README.md Behaviour notes define overdue as due date earlier than today (local date) AND status not Completed; today is not overdue and displays "Due today" for non-Completed tasks. src/utils/dates.js isOverdue and todayString implement the rule; src/components/TaskCard.jsx displays "Overdue" or "Due today" and colors overdue dates.	
Related Test Cases	TF-25 : TC-C-025 - Completed overdue card has completed styling and no overdue treatment [Version :1]TF-26 : TC-C-026 - Completed task due today omits Due today badge [Version :1]TF-37 : TC-C-037 - Fixed local yesterday-today-tomorrow by completion state [Version :1]TF-38 : TC-C-038 - Overdue result changes when a task becomes Completed [Version :1]TF-39 : TC-C-039 - Due-date relation follows local calendar day, not UTC parsing [Version :1]

Requirement: **REQ-C-008 : Local calendar day and date display**	
Version :	1
revision:	1
Author:	lanya
Status	Valid
Type	Use Case
Coverage	100% (1/1)
README.md TF-REQ-006 and Behaviour notes define due dates as local calendar days. src/utils/dates.js todayString uses local year/month/day, formatDueDate formats a YYYY-MM-DD value with en-US short month/day/year, and formatToday formats the supplied local Date as a weekday and full date. src/components/TaskCard.jsx renders "Due: <formatted date>" and src/components/TopBar.jsx renders the formatted current day.	
Related Test Cases	TF-28 : TC-C-028 - Valid leap-day date is retained and formatted [Version :1]TF-39 : TC-C-039 - Due-date relation follows local calendar day, not UTC parsing [Version :1]TF-40 : TC-C-040 - Due-date formatting is stable for a fixed date [Version :1]TF-41 : TC-C-041 - Local today helpers use fixed local date rather than wall clock [Version :1]
